

Texture Enhancer

Cementitious Antiquing Agent

Product Description

Deco-Crete Texture Enhancer is a Proprietary blend of pigments, cement and carrying agents. When mixed with water, Texture enhancer will add a permanent secondary color to stamped concrete, overlays and many other textured surfaces. Texture Enhancer, when applied properly, will settle in the low areas of the concrete or overlay, enhancing the look of the textured surface.

Benefits & Features

- Sprayable or brush applied
- Ability to control the amount of accent color applied to stamped concrete
- Add accent color to old or new stamped/textured concrete and overlays
- Color matched to Deco-crete antique release agents

Coverage

1500-2500 square feet per container

Application

Add 1 scoop of Deco-Crete Texture Enhancer per 1 gallon of clean water. Mix vigorously with a paddle mixer or stir stick until the powder has been incorporated into the water. Texture Enhancer can then be applied using a pump up sprayer or soft applicator brush spreading evenly over the entire surface of the slab. During application the product must be kept agitated to avoid settling in the bottom of the container. It is important to maintain a wet edge to avoid brush marks. Slightly dampening the slab in warm weather is recommended to give Texture Enhancer adequate time to settle before drying out and also helps to avoid brush marks. Texture enhancer is not to be applied to previously sealed or coated concrete. It is important to seal Texture Enhancer only after the concrete has had adequate time to fully dry.

KEEP OUT OF REACH OF CHILDREN. Before using or handling, read the Safety Data Sheet (SDS) and War-

Warranty

This product is not for public use and is intended for use by licensed contractors, experienced and trained in the use of these products. It is warranted to be of uniform quality with manufacturing tolerances. The manufacturer has no control over the use of this product, therefore, no warranty, expressed or implied, is or can be made either as to the affects or results of such use. In any case, the manufacturer's obligations shall be limited to refunding the purchase price or replacing material proven defective. The end user shall be responsible for determining product's suitability and assumes all risks and liability.

Notes

Deco-Crete Supply is not responsible for application methods, finishing techniques or any other variables that cannot guarantee the final appearance to be an exact match. Texturing or other finishing techniques such as troweling or brooming, slight variations in raw materials, and the use of sealers may produce color variations. Deco-Crete Supply recommends that a representative jobsite sample be made for each product used.
